SUMMARY

Electronics and Communication Engineering student with hands-on experience building and deploying full-stack applications using React, FastAPI, PostgreSQL, Firebase and Docker. Comfortable with Git-based development, backend APIs, databases and Linux environments, with a strong interest in DevOps, automation and reliable software deployment.

EDUCATION

Bachelor of Engineering – Electronics and Communication Engineering

PES College of Engineering, Mandya

Oct 2023 – Present

TECHNICAL SKILLS

Programming: Python, C, C++, JavaScript

DevOps: Docker, Docker Compose, GitHub Actions, CI/CD

Cloud: AWS

Monitoring: Prometheus, Grafana

Web & Infrastructure: Linux, Nginx, REST APIs

Development: Git, GitHub, FastAPI, React, PostgreSQL

PROJECTS

Career Pilot – Full Stack Platform with DevOps Pipeline

2026 – Present

- Containerized React frontend, FastAPI backend and PostgreSQL services using Docker and Docker Compose for consistent development and deployment environments.
- Built a CI/CD pipeline using GitHub Actions to automatically build, test and deploy the application on every production release.
- Deployed the containerized application to cloud infrastructure and configured Nginx as a reverse proxy for frontend and backend services.
- Integrated Prometheus and Grafana for application monitoring, service health tracking and performance visualization.

HireLens – AI Resume Screening Platform

2025

- Built an end-to-end resume screening application using Python, NLP and AI-based candidate evaluation.
- Developed application workflows for resume processing, job-description matching and automated candidate scoring.
- Integrated frontend, backend and AI components into a working application and maintained the project using Git and GitHub.

IntelliThreat – Threat Detection Platform

2025

- Developed a Machine Learning based system for detecting abnormal user and vendor activity using behavioral analysis.
- Built dynamic risk-scoring and security-event monitoring workflows for identifying suspicious activity.
- Designed the application as multiple connected components for data processing, threat analysis and dashboard visualization.

INTERNSHIP EXPERIENCE

Machine Learning Intern – Elevate Labs (Remote)

Nov 2025 – Dec 2025

- Completed a structured 4-week internship covering data preprocessing, model development, evaluation and application integration.
- Applied supervised and unsupervised Machine Learning algorithms to real-world datasets.
- Built HireLens as an end-to-end application integrating data processing, AI-based evaluation and an interactive interface.

CERTIFICATION

Artificial Intelligence and Machine Learning Internship – Elevate Labs

ADDITIONAL

Areas of Interest: DevOps, Cloud Computing, Backend Engineering, Automation, Linux, Software Deployment
